

2"x1" Direct Thermal Cleanroom Labels with Permanent Adhesive

Product Details

Description

Matte topcoated direct thermal printable white polypropylene film coated with permanent pressure sensitive acrylic adhesive backed with a clear, ultra smooth polyester release liner that is die cut into 2"x1" labels and perforated.

Features

Particle-flow controlled - cleaned, slit, rewound, and double bagged in a Class 100 cleanroom

Odor controlled - made with low outgassing adhesives

Waterproof - label will not lift or tear apart when submerged under water

Smudge resistant - will remain legible when wet or when written with permanent marker

Tear free - removes from high and low surface energy surfaces easily without ripping apart

Custom Made Cleanroom Labels

If your project requires a different cleanroom label solution, our cleanroom labels can be customized to satisfy a wide range of technical requirements.

Form Factor - Die cut and tailor your labels to fit practically any dimension or containers, products, and packaging

Construction Type - Available in rolls or sheets, piggyback, and label set constructions

Topcoat Finish - Choose from a variety of matte, gloss, and semi-gloss topcoat selections

Printing Options - Compatible with thermal transfer, direct thermal, inkjet, and standard laser printers

Adhesive Grade - Pick from permanent, semi-removable, and removable adhesives

Sterile Indicating - Utilize chemical indicators that fit your sterilization processing method

Printing Capability - Labels can be fully printed, partially printed, blank, or hand writeable

Material Selection - Select from multiple forms of premium facestocks, plastic cores, and liners

Surface Resistance - Can provide material that exhibit chemical, moisture, UV, and temperature resistance

Find the right labels for your cleanroom

In order to find cleanroom labels that perform and properly satisfy your quality standards, it is important to partner with a label expert familiar with a wide array of controlled environment applications. The CleanMark Labels team has extensive experience working with companies involved with advanced research and manufacturing. Our aim is to make finding the right labels for your cleanroom application quick and easy.
